

Why Posture Matters

The Most Common Areas of Pain from Poor Posture

Poor posture causes chronic back and neck pain, migraines, stress, sleep disturbances, neural problems, muscle strain, disc degeneration and many more problems.

Why Lifting Correctly is Particularly Important

Poor Seated Posture Causes Many Muscular Changes

Sitting slouched or hunched over puts 200lbs of pressure through your lumbar spine. Poor sitting posture results in shortened hip flexors and long weak gluteus muscle, rounded shoulders and a head forward (poking chin) posture.
